

# Certificate of Completion

---

This document is to certify that

**Iñaki Gonzalez**

*Has Successfully Completed the Following Education Course:*

**Base Stabilization with DriveGrid**

*On January 23rd, 2026 Representing 2 Hours of Education*

---

A handwritten signature in black ink, appearing to read "Iñaki Gonzalez".

## **Base Stabilization with DriveGrid**

DriveGrid is a triaxial geogrid manufactured for Unilock by Tensar International. It is used to mechanically stabilize pavement base material for roads, parking lots and residential driveways. This course will help the user on how to properly use DriveGrid in residential applications for the prevention of rutting and settling.

**Internal Course Code:** Base\_Stabilization\_03 **Delivery Method:** On-demand e-learning program

---

For fifty years, Unilock has been helping people create beautiful outdoor spaces that become treasured places to build lasting memories. It all started when our founder brought a revolutionary new paving method to North America, called the Uni-Stone. Since then, other companies have tried to follow in our footsteps, but Unilock remains the style and technology leader.
